

UNIVERSITY AND RESEARCH FOR INNOVATION

In this stand, you will be guided on a comprehensive journey into the world of snow sports, exploring innovation, well-being, and respect through the following 5 keywords.

PHYSIOLOGY

Study and optimization of the athlete's physical and biomechanical performance

PERFORMANCE

Optimization of the mechanical performance of skis and equipment to maximize speed, control, and efficiency.

SAFETY

Development of advanced protection systems to reduce the risk of injury in high-speed skiing sports.

COMFORT

Study of the mechanical and functional characteristics of skiing equipment to define and improve comfort and controllability.

SUSTAINABILITY

Research on sustainable materials and solutions to reduce the environmental impact of skiing equipment.
